## PROFESSIONAL SUMMARY

AI Software Engineer with 2.5+ years of experience specializing in **Generative AI, Autonomous Agentic Systems, and enterprise-grade backend development**. Proven expertise moving complex LLM capabilities from early-stage prototype to scalable, secure, and operationally ready production environments. Adept at implementing multi-step orchestration workflows, designing robust Retrieval-Augmented Generation (RAG) pipelines, and establishing metrics-driven evaluation harnesses. Deeply committed to engineering hygiene, governance-by-design, and high-cadence delivery utilizing **Claude Code** for daily development workflows.

## CORE TECHNICAL SKILLS

- **GenAI & Agentic Systems:** LangChain, LangGraph, CrewAI, PydanticAI, Tool/Function Calling, Structured Outputs, Multi-Agent Systems.
- **RAG & Vector Operations:** Semantic Retrieval, Chunking/Context Strategies, Document Embedding, Vector Stores (ChromaDB, Pinecone).
- **AI Evaluation & Observability:** Offline Test Harnesses, Regression Checks, Retrieval Scoring, Cost Tracking, Distributed Tracing, Logging Stacks.
- **Cloud & Infrastructure:** AWS, Microsoft Azure, Google Cloud Platform (GCP), Docker, Kubernetes, OpenShift, CI/CD Paved Paths.
- **Languages & Frameworks:** Python (Clean Code, TDD, Refactoring), Bash, SQL, Django, Django REST Framework, Laravel.
- **Engineering Hygiene:** Agile (Scrum/Kanban), Advanced Git, Architectural Decision Records (ADRs), Runbooks.

## PROFESSIONAL EXPERIENCE

### Agentic AI Developer

Niveus Solutions (part of NTT Data)

Jan 2026 – Present

Remote

- **Autonomous L1/L2 AI Agents:** Architected and deployed embedded AI agents to autonomously handle L1 and L2 IT support workflows, significantly reducing manual intervention in enterprise operations.
- **Tool Calling & Multi-Step Orchestration:** Implemented function schemas and multi-step reasoning, enabling the agent to securely query diagnostic databases, execute recovery scripts, and manage complex operational resolutions.
- **Productionizing AI:** Transitioned the agentic system from prototype to production by ensuring operational readiness, rigorous failure-mode handling, and graceful human-escalation pathways.
- **AI-Assisted Engineering:** Utilize **Claude Code** as a default daily engineering workflow to keep code changes small, modular, well-scoped, and documented for rapid, policy-aligned peer reviews.

### Agentic AI Developer

Spottal

July 2025 – Dec 2025

Remote

- **Embedded AI Capabilities:** Designed and built retrieval-augmented experiences and multi-agent workflows to automate enterprise candidate sourcing and intelligent job matching.
- **Model Context Protocol (MCP):** Implemented robust MCP tools to securely connect LLM reasoning layers with internal relational databases and normalize unstructured enterprise data.
- **Observability & Analytics:** Instrumented AI services for tracing, payload logging, and feedback loops to build operational dashboards supporting live debugging and continuous quality learning cycles.

### AI & Systems Automation Engineer

IBM Indian System Labs

April 2024 – July 2025

Kochi, Kerala

- **Intelligent Diagnostics & Recovery:** Engineered automated diagnostic scripts and evaluation tools that leverage rule engines and semantic validation to dynamically troubleshoot infrastructure deployment and upgrade failures.
- **Operational Readiness:** Defined operational standards and authored durable runbooks, rollback frameworks, and automated recovery mechanisms to confidently handle production incidents with zero-downtime impact.
- **Platform Tooling Foundations:** Contributed to reusable infrastructure templates and custom Ansible configuration hooks to establish safe, predictable, and highly reviewable CI/CD deployment lifecycles.

### Python & Data Developer

Novigo Solutions

May 2023 – April 2024

Mangaluru, Karnataka

- **Enterprise Data Foundations:** Designed and maintained high-performance data transformation and processing pipelines on **Google Cloud Platform (GCP)** using **Dataflow, BigQuery, and Cloud Storage**.
- **Clean Code & TDD Practice:** Built secure, well-structured backend components and corporate utility features using Python, following strict Test-Driven Development (TDD) principles and clean refactoring.

## RELEVANT AI & BACKEND PROJECTS

---

- **Intelligent Agentic Scheduling & Constraint Engine:** Built an automated resource-planning platform using Python and Django that applies rule validation and multi-step evaluation logic to resolve complex scheduling constraints and institutional timetables.
- **Enterprise Policy-Aligned Leave Management Platform:** Developed a full-stack secure management dashboard utilizing Python, Django, and PostgreSQL featuring automated asynchronous background task queues, email notification systems, and strict role-based data isolation.

## EDUCATION

---

**B.E. in Information Science and Engineering**

2023

Visvesvaraya Technological University (VTU)

Core Focus: Software Engineering Principles, Advanced Data Structures & Algorithms. CGPA: 7.63

## PROFESSIONAL CERTIFICATIONS

---

- **Microsoft Certified:** Azure AI Engineer Associate (*Validates alignment with Azure enterprise AI standards*)
- **Microsoft Certified:** Azure Data Scientist Associate
- **Google Cloud Certified:** Professional DevOps Engineer
- **Google Cloud Certified:** Professional Data Engineer (PDE)
